

PROGRAMME TITLE	NQF	SAQA ID	CREDITS
National Certificate Supply Chain Management	5	74149	150
* TETA accredited			

## DESCRIPTION

Supply Chain Management is a dynamic and empowering experience on how business gets done. Supply Chain Management spans all movement and storage of raw materials, work-in-process inventory, and finished goods from point-of-origin to point-of-consumption.

Countless firms rely on new technologies and the coordination of processes to expedite the distribution of goods. The use of computers to analyse work routines in order to optimize the use of available labour has led to increases in productivity. Modern systems development and related processes have created an entirely new set of integrated operations management functions, which require managers of supply chains, resource managers of material or manufacturing resources planning (MRP), and process and inventory control managers.
